

# STILL NAVIGATING MICROSOFT 365 IN THE CLOUD AND ON-PREM?

Most companies today manage their environment both in the cloud and on-prem. But, that can introduce complexity that can make already-complex Microsoft 365 management even harder.

## THE HARD - BUT NORMAL! - WAY

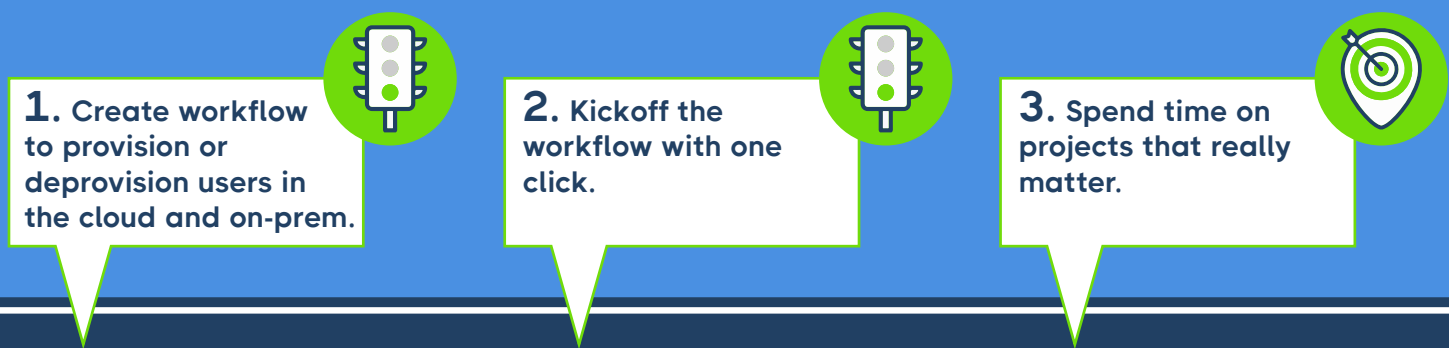

Does this look familiar? In a hybrid Microsoft 365 environment, even the simplest admin tasks can be complex. Between logging into multiple portals and waiting for everything to sync, even onboarding a new employee can take quite a few steps.

## THE EASY WAY - WITH COREVIEW

What if you could dramatically reduce the burden of your hybrid M365 management?

With CoreView, instead of logging into multiple platforms to create each user, you can log into **one platform** to provision and deprovision users automatically, simultaneously across the cloud and on-prem!

**DID YOU KNOW?**

Our customers report saving between **30-40%** of admin time with CoreView.
