EMAIL SECURITY THREAT SCAN

Discover potential hidden threats lurking in your Microsoft Office 365 mailboxes. Claim your free email security threat scan now to reveal what's concealed in your inbox.

Find out what's hiding in your inbox

The Barracuda Email Threat Scanner will quickly and effectively find social engineering attacks currently sitting in your mailboxes.

● **Threat Summary**

Identify which email threats types you are exposed to and are not fully protected against

● **Employees at risk**

Gain visibility into which employees are the most susceptible to attacks and risk factors

● **Domains at risk**

Find domains that are not protected by DMARC and can be used to send fraudulent emails

● **ETS Dashboard**

Understand email sender intent to detect social engineering attacks via Barracuda's artificial intelligence platform

98% of organizations with Office 365 harbor malicious email inside their mailboxes*

Speak with an email security expert

Our email security experts will walk you through the scan, guide you through the results, and provide recommendations to improve email security measures.
